Why is my sharp tv not turning on

Sometimes Sharp TV doesn't get a sufficient power supply which prevents the device from turning on. In addition, if the Sharp TV won't turn on, it means the television is having a power issue. In such a case, various problems might occur. The tv can't load pictures or blinks the power indicator light simultaneously. This problem generally occurs when there is a lack of power supply or the power board of the tv is broken. When there is free time, I like to relax a bit much. For instance, I watch TV. But unfortunately, the Sharp TV won't turn on. It disturbs all of my relaxing moods and I cannot enjoy television shows and movies. However, I have tried some of the methods to troubleshoot the power insufficiency issue on my tv. Luckily, all those troubleshooting methods worked on my tv and I was able to fix the issue. The fixing method of the Sharp tv won't turn on issue works on almost every model of the sharp tv brand. However, you have a different model Sharp TV. The process is still the same but in the settings, some contents may get changed. What Causes Sharp TV Won't Turn On There are various culprits of Sharp TV won't turn on. For instance, there are also many ways of fixing the issue. As it turns out, there are several reasons that are responsible for causing Sharp TV won't turn on the issue and they are: Lack of proper power supply. There is no doubt electronic appliances need balance power to work smoothly. However, using a volt guard or UPS (Uninterruptible Power Supply) fix the issue of low power supply.Damage Power Cord/Cable: If the power supply cable is broken, it can't supply the proper amount of voltage to the television. Sometimes tv doesn't get any power from the source. Ensure the power supply cord is healthy.Corrupted Data File: According to the user's report, the Sharp tv won't turn on if the system files are corrupted, etc. How to Fix Sharp Tv Won't Turn On Issue Here are the troubleshooting methods for fixing the Sharp TV won't turn on the issue. Apply these instructions step-by-step to get rid of Sharp TV won't turn on the issue: Method 1: Verify the TV is Getting Power When there is no power supply to the television, the led light won't blink at all. There could be the chance of the power supply cable is not properly connected to the tv. However, if there is no issue with the power supply wire. It means the wall socket has the problem. As it turns out, here are some of the checking measures to verify the tv is actually receiving the power supply: Make sure both ends of the power supply cable are connected to the tv and the wall socket.Now, you may see the led light blinking on the front panel of the television. If there is no sign of led light blinking, plug the power cord into another outlet.If the tv is still unable to turn on, it means the power supply cable might be damaged. Try replacing the cable with the new one, etc. Method 2: Replace the TV Remote Battery If the led indicator light blinks on the television, it means the tv remote is not working. For instance, the tv remote is causing the issue because its battery is damaged. When you press the power button on the tv remote but the tv doesn't respond. However, the tv will remain in its own state i.e. black screen and led light blinking. The quickest way to fix the issue is to replace the batteries on the tv remote. Remove the battery cover and the battery from the tv remote.Insert the new pair of batteries on the remote.Close the battery cover. Now, press the power button on the tv remote and the tv will turn on. Similarly, if the Sharp tv won't turn on then there might be the tv remote broken. Ensure the IR sensor is not damaged and there is no object blocking the sensor's signal. Method 3: Reset Internal Power Supply If there is no problem with the television remote ensure to check the routine of the power supply. In addition, the power supply is the major factory that may cause and persist the tv won't turn on issue. Sometimes internal power supply is causing the issue. For instance, power is not received by the television. This issue never gets a sharp tv turn on. In order to fix the issue, you have to reset the internal power supply. To do that, follow these given instructions step by step: Disconnect all the plugged wire from the tv.Remove the power cord from a power supply device such as UPS.Wait for at least 20 seconds.Connect and plug all the power supply cables as well as other cables.Now, your sharp tv will surely turn on. Method 4: Vist Customer Support Unfortunately, if none of the solutions helped to fix the sharp tv won't turn on the issue. Do not lose hope. There are still a lot of ways to get your smart television fixed. After applying all these instructions, we hope you won't get stuck with the problem. But if you do then, visit the customer care center near you. However, if your're tv is still running on the warranty. The customer service will easily fix the issue. Technically, sometimes it may cost you a bit when your tv's warranty has been expired. Thus, the customer support of Sharp tv will certainly fix the issue. Final Thoughts The sharp tv won't turn on the issue causes due to the low power supply. Similarly, you have to provide the proper amount of power to the tv in order to get the issue fixed. If there is a low voltage in your area, use UPS to balance the power. For instance, you should have to regulate the power supply cable of your tv in order to fix the issue. If your tv is damaged, visit the nearest customer support to repair the tv. How to Factory Reset Panasonic TVsamsung TV Remote Not Working Fixed FAQ on Sharp TV Won't Turn On 1. What do you do if your Sharp TV won't turn on? Ans: You have to change the power supply cable if the sharp tv won't turn on. Sometimes, tv blinks but doesn't show anything. It means the tv remote is not working. Therefore, you have to replace the tv remote battery to turn on the tv. 2. How long should a Sharp TV last? Ans: According to the Sharp TV manufacturer, the lifespan of sharp tv is 4 to 10 years. It means tv can last between 40,000 and 100,000 hours depending on the usage. Sharp TV won't turn on? Sounds like a common problem. Luckily, there's a simple fix - and this troubleshooting guide will walk you through it. Let's go over the different possible issues, and then move to a quick solution for each one. The Sharp TV is a very famous and economical TV and known for its picture quality. But if the television doesn't turn on at all, then it is a matter of concern. If you're having trouble with your Sharp TV, there are a few things that you can check without calling customer service. Double-check that the power cord is plugged in and the TV itself has power; if you're using a cable box or satellite receiver, make sure it's turned on as well. Check for adequate ventilation around the TV to ensure that heat isn't building up in the back of the unit. Sharp TV Won't Turn ON - Troubleshoot and Diagnosis When your TV refuses to turn on, it can be a hassle. While there are many possible reasons and fixes, they need to be approached differently, depending on the issue. If your TV isn't turning on, try these step-by-step solutions and troubleshooting tips. Ensure that Sharp TV is getting Power If your television's power is turned off or the TV is unplugged, the LED light will not blink at all. If the LED light does not flash when the TV is powered on, there is an issue with your TV's power supply. The first thing to try is plugging in a different device to make sure you don't have a power issue. If that doesn't work, there may be an issue with your wall outlet. Here are some steps to make sure your television is getting the power supply it needs: Check both ends of the cable. If you're using an extension cord, make sure it's functioning properly and that you've gotten a strong connection for the plug. If you're still having issues, try plugging directly into the wall socket. If your television doesn't turn on, there may be something wrong with the power cord. Try plugging it in another outlet. If the LED light still does not turn on, the problem may be with your power cord or the cable itself. You can try replacing them. If the TV still does not turn on, you may need a new power supply. Issue with TV Remote Batteries If the LED indicator light blinks on your TV, it means the remote's battery is low and requires replacement. Replacing the battery should solve the issue. If replacing the battery does not work, the remote's internal receiver may need to be replaced. We've all been there — your remote stops working and you've got no idea how to fix the problem. When it comes to the world of electronics, they don't always play nice with each other, which means that you have to do a little detective work in order to identify what is causing the issue. If your remote control isn't working, try replacing the batteries. Remove the battery cover and place a new pair of AAA batteries into the remote. Now press any button to turn on the TV and try out your remote. If this doesn't solve your problem, check if you can find any lost or stuck buttons on your remote. If the Sharp TV won't turn on, this could mean that the remote control is defective. To troubleshoot the remote control, check for any damage to the IR sensor and ensure there is no object blocking it from sending a signal. Check the sleep timer Many people use this mode when watching TV at night so that you can go to sleep peacefully without being disturbed by the background noise. However, this is not a suitable setting for some programs. If the TV keeps turning off during playback, check to see whether the sleep timer is turned on. Please check if the Sleep Timer is set to on. If the Sleep Timer is turned on, please turn it off by following the steps below: Press Menu on your remote control. Press the left or right arrow keys to highlight Settings. Press Enter. Highlight Time Setup and press enter. Select Sleep Timer and press enter. If it is on, turn it off. Reset Internal Power Supply If your TV isn't turning on, check the power source first. If you're using a plug-in style power adapter, be sure it's connected firmly to the wall outlet. Make sure there are no visible cracks in the adapter or loose connections. If it's possible, test with another TV that you know works. Check to make sure the power outlet you're using is working by plugging in another device, like a lamp. If no other devices are working in the outlet, it can be due to an electrical problem in your house and should be reported. Power issues are some of the most common problems that many users face. Typically, the problem is caused by the power supply, which may malfunction and be unable to provide a steady flow of energy to the TV unit. Here is how you can fix your TV if it's not responding or powering on: Disconnect the power cord from the wall outlet. Remove all the connected wires of the television. Wait for twenty seconds. Connect all the cords and wires again. In this way, it will be possible to see a clear picture on your television set without any issues. Sometimes your TV won't turn on. This can be caused by a few reasons, but the issue occurs due to low power. To fix this, you need to make sure you have enough power in your area. This can be done through using a UPS (Uninterruptible Power Supply), which helps to balance the power across your areas. Sharp Aquos TV Won't Turn ON Should your Sharp Aquos TV not be performing as expected, there are plenty of ways you can troubleshoot the issue. Have a look at this list of potential solutions to fix your screen problem: Check that the TV has power by looking for a light or other indicator near the plug at the wall outlet Connect all cables to and from the TV correctly - look for a sticker or icon on each cable that shows what device it belongs to. Make sure your TV is receiving power, that it has proper ventilation, that the remote is operational, that all cables and wires are connected properly, and ensure your devices settings are correct if running into trouble. Sharp TV Won't Turn ON Power Light Blinks If you see a blinking yellow light on your Sharp TV, then it's quite likely that the TV is "blinking." If this happens to you, there are several possible causes of the problem. The first thing you should do is check whether it is flashing because you pressed some button on the remote or if it's a more serious issue. If you're having trouble with your TV, the first thing you can do is to press the power button on the remote or at the back of your TV for five seconds. This will discharge any static electricity that may be in the device, and it could get your TV working again. If that doesn't work, then you should carry out a hard reset. This process will remove any settings you've made and revert your TV to factory settings.
